

HOMOZON© . . . Oxygen-Therapy-Blass©

What Is Oxygen - Its Origin - Its Action?

Oxygen is the most important element of life. We find this life-giving element as molecular Oxygen in the air. A healthy body can inhale and transport enough Oxygen to maintain itself in good repair.

But, due to an ever increasing lack of, destruction of and polluting of the Oxygen (as well as food

and water) in our environment, we see disease and suffering on the increase. An ailing body often cannot make use of Oxygen efficiently through inhaling either normally or artificially because in most cases the necessary biological carriers (minerals, nutrients, blood factors) for it are lacking. Subsequently the Oxidation process falls short and acute. Chronic and incurable ills result. Fasting would allow the Oxidation of disease matter, but fasting is limited as molecular Oxygen cannot Oxidize quickly enough to eliminate all disease causing impurities or foreign matter (toxins).

Therefore in order to succeed, we need other Oxygenating or Oxidizing methods to eliminate the cause of disease. We make use of Oxygen in another form using other channels than the respiratory tract. Since the real cause of disease is located in the digestive tract and its organs, we therefore must deliver the purifying natural agents directly to the alimentary (digestive) tract. Starting the detoxification or purification directly from that point, enhances the creation and circulation of normal vital fluids. Only, if the passages are clean, their composition pure and perfect, can we then expect a normal working healthy body or that state we call homeostasis.

THE DISCOVERY OF OXYGEN THERAPY.

The Physician *Priestly* first found molecular

Oxygen in the air in 1774; however, the presence of its life-giving power was known long before. In history we find references to the *Breath of Life* and *Prana* in all ancient civilizations. The German Chemist *Scheele* had found Oxygen in the air In 1773. Priestly was the first man who showed the Oxygen road to a drug-less, knife-free and needle-less healing. He truly was inspirer of our present day Oxygen-Therapy-Blass©.

Following his directions given in 1774, many humane and worthy physicians, chemists and other health scientists kept busy trying to reach this goal. Nearly 140 years later a German Chemist, after much hard struggles, successfully reached this end. He discovered and perfected a preparation which proved by practical tests, to be not only a purifier of the alimentary tract but also to release Nascent (born free, available, active) Oxygen that follows the channels of the vital fluids. In fact, this Nascent (born free, available, active) Oxygen is carried by the life circulating fluids throughout the whole body. This enables the ailing body to help itself back to a purified state and a restoration of normal Oxidation. A private, proprietary process is used with alkaline earths to obtain these compounds.

The chemist who discovered these compounds found, Oxygen could be bound together by electrical discharge to form Ozone or *O₃*. Ozone is a highly active form of Oxygen that contains 3 parts (atoms) of Oxygen in one molecule. It is Nature's most active purifier and destroyer of bacteria, germs, parasites and worms. In its Nascent form it is the most powerful Oxidizing agent known and available for healing purposes. Over the last 100 plus years, Ozone has been found to be effective in many applications from industrial and municipal water purification to blood purification and full health optimization at home and abroad.

Ozone is evident in nature by its fresh, invigorating odor in the pine forest and at the seashore or

following a thunder and lightning storm. Oxygen is contained in this Ozone form in our basic preparations, acting as laxative or anti-lax depending on the specific powder. The positive action of the Nascent Oxygen makes these preparations unsurpassed as natural purifiers.

OXYGEN THERAPY - The Best Detoxification.

Dr. Otto Warburg, the only person in the history of medicine to win the Nobel Prize twice in medicine (nominated three times) found, any cell turned cancerous when deprived of 50% or more of its Oxygen. Because the true cause of all disease is cellular degeneration and death the end result. Keeping the body cells and its components in top working order is imperative. There is no better way of detoxifying the body and thereby the system, organs and cells of the body than through enhancing the Oxidative and Reductive mechanism or, as Dr. Warburg said, to literally ***FLOOD THE BODY WITH OXYGEN.*** The most efficient Oxidizing agent known is Ozone. More than 100 years of scientific study and practical usage has brought this conclusion to the minds of many scientists, industrial experts and health care practitioners. Whenever true Nascent Oxygen releasing preparations have been used properly in the treatment of disease, the results have been astonishing. However, Nascent Oxygen in its gaseous form cannot be easily brought into the alimentary tract for optimizing health; it can only do so if bound to other substances (minerals, water, etc.).

What Oxygen Therapy Is And How It Works For Us.

The compounds, HOMOZON®, MAGOZONE®, CALOZONE®, Q-OZONE®, SAN-O-ZON® and CUTOZON® (corporately called OXYGEN-THERAPY-BLASS®) are part of a life style program originating in 1898 and encompassing more than 100 years of Oxidative scientific study. The scientists involved have been illustrious and many. The therapy they founded in Germany came to the USA in 1900, was optimized in 1990 with scientific studies continuing today. The present institute is involved in the translation of vast amounts of German data being used for further optimization of these compounds.

What is HOMOZON®?

Homozon® is a compound of magnesium and Oxygen in which the magnesium atoms form a loose lattice onto which much Oxygen is bonded by catalytic process. When taken with lemon juice or other acidic juice, Oxygen is released inside the digestive tract, producing many benefits. Oxygen content of one teaspoonful of Homozon® is about equal to one 16-ounce bottle of 3% hydrogen peroxide in oxygen content without the hydrogen.

As do most Oxygen therapies, Homozon® provides Oxygen to the body in the form of Nascent (born free, available, active) Oxygen or *O1* Singlet Oxygen, also called the Oxygen free-radical, which does not have to be converted by the body into a form of atmospheric Oxygen *O2* we normally breathe. Nascent Oxygen is Oxygen in its most chemically active, born free and available form, and is the only form of Oxygen the body uses.

Homozon® has a wonderful laxative effect. The stool is always loose and bowel movement regular and, depending on the dosage, frequent. Some people consider the bowel-loosening action of Homozon® a problem, but is really one of its desired effects, facilitating elimination of toxicity through the bowel, yet Homozon® lacks the habit-forming or bowel-weakening effects of some laxatives. Taking Homozon® approaches colonic therapy in flushing the bowel.
