

HEALTH AND STRENGTH THROUGH OXYGEN

Why is **OXIDATION** so vital to human life? When Oxidation stops, then life stops. Its shortage causes poor health. Its abundance maintains good strong

health.

GOOD HEALTH is the condition of being physically and mentally sound, a normal functioning strong body.

POOR HEALTH is a poor functioning, un-healthy weak body, damaged health due to impure vital fluids and poor functioning organs.

HEALING is the elimination of the cause of poor health, the restoration and repair of damaged health.

OXYGEN-THERAPY-BLASS©

Oxygen-Therapy-Blass© is a basic plan for the restoration and maintenance of health through Oxygen. The body is invigorated by Oxygen.

OXYGEN in its most active state is a natural purifier and revitalizes and rejuvenates health. The best purifying and strongest Oxidizing agent for the body is Ozone, which releases Nascent (born free, available, active) or Active Oxygen. It is bound to minerals and set free in the digestive system where it easily combines with moisture, organic and inorganic substances through Oxidation. It neutralizes and removes toxins or poisons, heavy metals and harmful anaerobic bacteria to rebuild a strong healthy body. Active Oxygen Oxidizes within the digestive system, blood, organs, cells, open wounds and inflamed mucus membranes.

ACTIVE OXYGEN is safe, gentle and not habit-forming, permitting normal bowel activity. It helps normal intestinal flora. Use it every day to keep the digestive system free of toxins or poisons permitting better use of essential minerals and nutrients.

ACTIVE OXYGEN works well for skin care in baths and washes to open pores, improve circulation, disinfect, deodorize, germicide and heal. It acts as a neutralizing agent and health protector. It is **HARMLESS**.

HEALTH is maintained when you keep the basic elements of blood in a normal healthy condition. Only then is normal Oxidation possible, the steady repair and support of the body. Oxidation maintains health and life. The lack of it causes damaged health. Without it life stops.

HEALTHY BLOOD is easy flowing, thin, real red, and is the necessary part to a strong healthy body. Such, normal vital fluids can carry enough inhaled Oxygen to maintain normal healthy Oxidation processes. Oxidation sustains strong organs and cells to do their normal function.

When foreign matters of any kind (like poisonous drugs, toxins, fermented or decayed substances) enter the blood stream and there is a lack of *Mineral Elements and Oxygen* then you change the normal composition of the vital fluids. Damaged health, subnormal body function, gradual decay or starvation of the body will result.

**A HEALTHY MIND NEEDS
A HEALTHY BODY . . .**

**ONE OF OUR MOST VALUABLE
EARTHLY POSSESSIONS!**

Living by the *Laws of Nature* helps prevent poor health and maintain good strong health. Prove it by providing your body with fresh air, regular exercise, enough rest, pure food and pure water with the Oxygen-Therapy-Blass© plan.

No other product today contains as much available Oxygen as the *Original Oxygen-Therapy-Blass©* (with Registered Trade Mark and Seal) products commonly known as HOMOZON©, MAGOZONE©, CALOZONE©, MACALOZONE©, SAN-O-ZON© and CUTOZONE©.

ORIGINAL OXYGEN-THERAPY-BLASS© PRODUCTS

HOMOZON© is an Oxygen Therapy product designed for internal use. It is a compound of Oxygen and beneficial gases bonded to magnesium in which the magnesium atoms form a loose lattice onto which much Oxygen is bonded by a proprietary catalytic process and released by catalysis. The health benefitting action is derived from the presence of magnesium peroxide, magnesium super-oxide and magnesium ozonide. Homozon© provides Oxygen to the body in the form of Nascent or *Singlet* Oxygen *O1* (also called the Oxygen free-radical) which does not have to be converted by the body into a form (atmospheric Oxygen *O2*) we normally breathe. Nascent Oxygen is Oxygen in its most freely available and active chemical form, and is the only form of Oxygen the body uses. It is the basic gentle Oxidizing preparation of Oxygen-Therapy-Blass©. It is a mild laxative, recommended for all ailments due to constipation, faulty assimilation, faulty metabolism or faulty elimination.

MAGOZONE© is Oxygen and beneficial gases bonded to magnesium. It is milder than Homozon© with a lightly sweet flavor. Magozone© possesses 75% of the activity of Homozon©.

CALOZONE© is Oxygen and beneficial gases bonded to calcium. It is an assistant gentle

Oxidizing preparation, an anti-laxative, used to stop ulceration, ulcerative or mucous colitis or if the user has chronic diarrhea or running bowels, catarrh and to normalize the system and stools.

MACALOZONE© is a mixture of Magozone© and Calozone© giving nearly normal stools.

SAN-O-ZON© is Oxygen and beneficial gases bonded to sodium and desert mineral salts. It is a *Neutralizing and Oxidizing* preparation used in gargles, douches, colon baths, and baths to stimulate and normalize skin action. It neutralizes and eliminates toxins or poisons from the skin.

CUTOZONE© ointment is an Oxygen-enriched salve for topical application. It contains Oxygen and beneficial gases bonded to magnesium, calcium and zinc with cell salts, beeswax and sweet oil. It is a *Neutralizing and Oxidizing* preparation used on the skin for every type of skin problem as well as for beautification.

Directions for HOMOZON©, MAGOZONE©, CALOZONE© and MACALOZONE©:

Daily rations vary according to an intended purpose. For internal use it is best to use small quantities at short intervals. Take about ¼ to several teaspoons as often daily as is desirable. Stir into six to eight ounces of pure spring water or distilled water and swallow. Follow with sufficient diluted acid, preferably lemon juice (¼ to ½ lemon) in water after each dose or you may also use fruit acid or citric acid powder. This will begin dissolving the powder setting free the beneficial gases for action releasing Oxygen inside the digestive tract producing many benefits. The purifying action continues when combined with hydrochloric acid in the digestive tract. This Active Oxygen is time released in about an 8-hour period.

(Easy access to a bathroom is advised for several hours after each serving is taken.)

It cleanses the bowel, and has anti-fungal, anti-candida, anti-viral and anti-bacterial properties.

Homozon© has a wonderful laxative effect. The stool is always loose and bowel movement regular and, depending on the dosage, frequent. Some people consider the bowel-loosening action of Homozon© a problem, but is really one of its desired effects, facilitating elimination of toxicity through the bowel. However Homozon© works by Oxidizing toxins and fecal matter in the bowel and not by irritating it as with conventional laxatives

PRODUCTS ARE GUARANTEED NON-POISONOUS, NOT HABIT-FORMING, HARMLESS, USABLE BY YOUNG AND OLD, INTERNALLY AND EXTERNALLY

PLEASE PAY SPECIAL ATTENTION TO THE FOLLOWING:

The preparations are non-poisonous, not habit-forming, harmless in large doses, produce no bad after effects, usable by young and old, internally and externally.

When active Oxygen comes in contact with toxins or poisons, heavy metals, bacteria or viruses, they are neutralized by Oxidation. Therefore, you may experience one or more of the following symptoms: soft stools (not diarrhea but oxidation), opening of sinus or nasal passage and a mild tingling sensation. The stool will normalize when the system becomes free of toxins or poisons. These are healing reactions, natural cleansing processes and not harmful side effects. Above all do not give up even if you decide to decrease the dosage. Do not misinterpret the symptoms as *bad* but rather be grateful for them. It is the price for recovery of your health.

The following is taken from an information sheet provided by the manufacturer and is not to be construed as medical advice.

What can be expected while using Homozon©?

The first effect one can expect while taking Homozon© is enhanced excretory function. Commonly noted also is an increase in overall energy. Where the increase in bowel function never completely abates, it does ease as cellular toxicity lessens and one remains on the product for some time. Effects do vary between individuals somewhat, but enhanced bowel function and increase in energy are the most noted effects.

How long will the 'loose stool' effect continue?

Homozon© does not cause diarrhea. Increased doses equals increased bowel function and improved assimilation. Effects do range from a loose stool to clear water, depending on the doses.

Remember . . . This is enhanced Oxidation and Oxygenation . . . NOT . . . pathological diarrhea with its accompanying sluggishness, dehydration and electrolyte depletion. Homozon© increases assimilation and enhances acidophilus and friendly bacteria's production; actually repairing bowel function, oxygenating the body, improving blood quality and assisting in parasite elimination.

What is the daily dose of Homozon© and how is it taken?

The dosage for an adult ranges from one quarter to several teaspoons two or more times daily, at least morning and evening. The average maintenance dosage is a teaspoon or more as desired. Homozon© is mixed into pure distilled or spring water, and then drink. Follow immediately with ¼ to ½ of a lemon squeezed into four to six ounces of pure water. Repeated tests on the product over the past 100 years to determine the safe and effective usage has found, up to thirty-two teaspoons can be consumed in one day with no detrimental effects noted. Your physician or natural health care practitioner should regulate dosage and frequency of use. The product is non-toxic, harmless, beneficial, effective and healthful.

*** The reputation of real Oxidation and Oxygen therapy has been validated by Nobel Prize Winner, Dr. Otto Warburg, director of the Max Planck Institute on Cell Physiology in Germany and the ONLY person to win the Nobel Prize in Medicine twice, with a three-time nomination.

The whole purpose of Oxygen-Therapy-Blass© and Oxygen Therapies in general is to assist in fulfilling the dictates of Dr. Otto Warburg who said to *FLOOD THE BODY WITH OXYGEN!*

The number of scientists, researchers, practitioners and patients has received both the scientific and healing rewards of *Oxidation Oriented Oxygen Therapy.* They now number in the millions with no detrimental side effects whatsoever.

*** Homozon© was first developed in 1898 in Germany, since then the formulation has been improved a number of times. Today there are many copycat oxygen products on the market. However we believe Homozon© is still the most effective product available. Oxygen content of one teaspoonful delivers about as much singlet oxygen as one 16-ounce bottle of 3% hydrogen peroxide. Another example is one teaspoon delivers about as much singlet oxygen as 750 drops of 35% hydrogen peroxide. For those who are new to oxygen therapy that is a lot of oxygen!

*** The oldest oxidation organization in the world

was founded as the Institute for Oxygen Therapy in Berlin in 1898. They commissioned Dr. F. M. Eugene Blass to open the Eastern American Association for Oxygen Therapy, which continues today as the International Association for Oxygen Therapy, Priest River, ID, USA
